

Simulator::Object

```
classDiagram
    Simulator::DirectoryTop --> Simulator::CDMA::Node
    Simulator::CDMA::Node --> Simulator::CDMA::Object
    Simulator::CDMA::Object --> Simulator::Object
```

The diagram illustrates a class hierarchy. At the base is Simulator::DirectoryTop, which inherits from Simulator::CDMA::Node. Simulator::CDMA::Node inherits from Simulator::CDMA::Object. Finally, Simulator::CDMA::Object inherits from Simulator::Object. The Simulator::Object class is distinguished by a dashed border, indicating it is an abstract class. The inheritance relationships are shown by solid arrows pointing from the child class to the parent class.
